## DREDGING & RECLAMATION WORKS

Green Monitoring Sdn Bhd makes land expansion possible via the method of sand dredging to create new land and widen shorelines for economic and social development such as ports, industrial factories, housing and tourism developments.

To defend vulnerable coastal areas from rising sea levels and strong waves, we build protective barriers or breakwaters. Its design, material procurement and construction of the structures of the coastlines are done to enrich the ecosystems whilst preventing erosion of coastal land, human settlement , and protecting the flora and fauna.

Beach nourishment & breakwater works

## MECHANICAL/FABRICATION WORKS

Green Monitoring Sdn Bhd is fully driven to expand their list of mechanical, fabrication, piping and engineering achievement by always providing solid results and robust quality management in the industrial sector.

Mechanical & Piping Fabrication
